**Subject:** Re: Wilcox Draft Geophysics Report  
**Date:** Monday, October 19, 2015 1:39:24 PM

---

Katrina,

From my perspective.. it is the figures that take the longest to do. The text needs some additions, but I'm looking at about 3 days of figures and a day of text. After speaking with Rick and Jon, I will be adding some figures regarding the GPR transect locations and anomaly locations. I'll be up to about 50+ figures, just spending 30 minutes on each and you can see where the time goes.

The majority of the text will remain nearly the same as what has been provided. I'm not comfortable promising you the text for your meeting, but I will have everything wrapped up and sent to Rick and Jon by Monday (10/26) morning. If you'd like some text on a specific section or area, I can pull something together for you.

Beth
